Front End Developer with experience creating responsive, mobile-first websites and applications. Currently working with the latest development stacks including **ReactJS**, **Webpack**, and **Continuous Delivery with AWS**.

Adept at working with a multitude of different technologies and systems. Demonstrated success and experience managing simultaneous projects, creatively solving problems, and attentive to detail.

Advanced Javascript knowledge with a strong understanding of object-oriented design. Passionate about utilizing the latest web technologies: **Node**, **D3js**, **NoSQL**, **Git**, **Gulp**, **Angular**, **Backbone**, **Underscore**, **SQL**, **HTML5**, **CSS3**, **SCSS**, **AWS(S3, EC2, DynamoDB, IAM, Cognito, Route53)**, and other JavaScript frameworks.

Web Producer Delta Dental, San Francisco

Apr 2017 - Mar 2018

Developed and maintained client facing website and employee portals for multiple high profile clientele

- Created new websites and employee portals utilizing established best practices
- Developed utility applications to enhance daily operations and increase team efficiency
- Lead training and adoption of GulpJS, HandlebarJS, PatternLab, and SASS stack
- Documented and maintained vital development work processes
- Spearheaded collaboration between departments and reduced operational redundancies

Frontend Software Engineer Advisor Software, Walnut Creek

Jun 2015 - Nov 2016

Developed financial planning applications across multiple platforms and services utilizing the latest methodologies of the Agile work process

- Extended existing Backbone.js application with behavior-driven testing, classes, modules, and proper scoping
- Created exceptional user experiences with efficient functional javascript to designers' specifications
- Integrated Advisor Softwares' RESTful API's and developed new visual representations of existing data
- Commandeered development of a Salesforce1 financial application with no prior knowledge of Salesforces' architecture and delivered a shippable product in less than 5 months

Digital Media Analyst Apollo Group, San Francisco

Oct 2012 - Aug 2013

Researched new affiliate media partners and maintained Apollo Ethics and Compliance database

- Regulated content on affiliate sites using analytics and web crawling utilities
- Maintained legal violation database for University of Phoenix's affiliate marketing team

Accomplishments

- Won Versal Educations' 24-hour Hackathon by creating a useful learning application
- Released game on #1 PC marketplace, Top 10 in recently released games for over a week, tracked hundreds of highscores using the Steam API with Unity ("Blokdodge")
- Created and monetized "Burger Machine 2020" for iOS, Android, and PC with over 15,000 impressions
- Created and released "Western Showdown" for the Apple App Store, a local multiplayer game with scripted AI

Open Source Projects

MaxwellVolz.com

- Personal website actively developed and maintained to showcase my various skills and projects
- AngularJS and Bootstrap, recently migrated to Amazon Web Services

In Other Words

- Developed and hosted a phrase translation web application with a user generated database
- AngularJS, Bootstrap, and Google Drive as a NoSQL database
